[Back to evaluations of Kerim Kaylan](#)

Calculating results. The evaluation report will appear below in a few seconds...

The headings of demographic questions will appear as links. Clicking this link will show a breakdown of all responses to the item by the corresponding demographic category.

The number of students choosing each response is shown in parentheses. A dark blue bar indicates the average response for Likert scale items (non-responses are excluded).

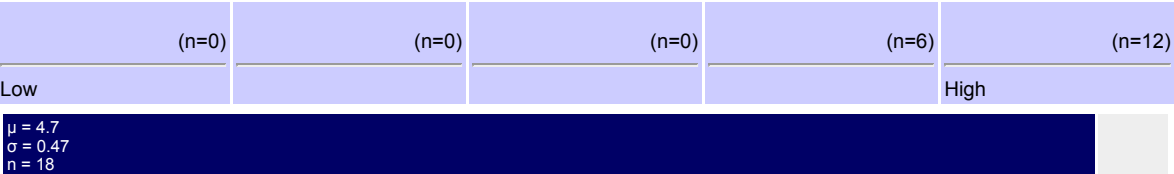

This evaluation was either filled out or specifically declined by 28 of registered students (%).

2016/2017 CTB I Fall Final Evaluation (2016/2017 CTB I Fall Final Evaluation - TA) - - Kerim Kaylan (16-17)

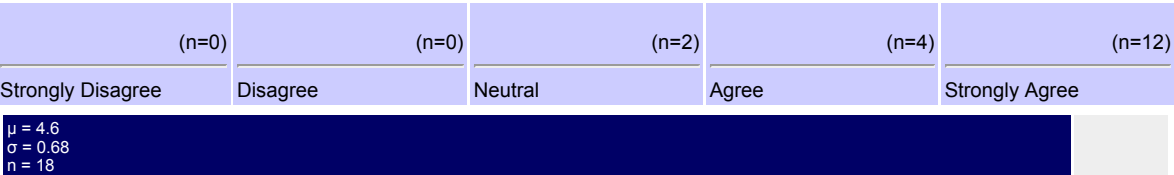

1: Rate the instructor's overall teaching effectiveness.

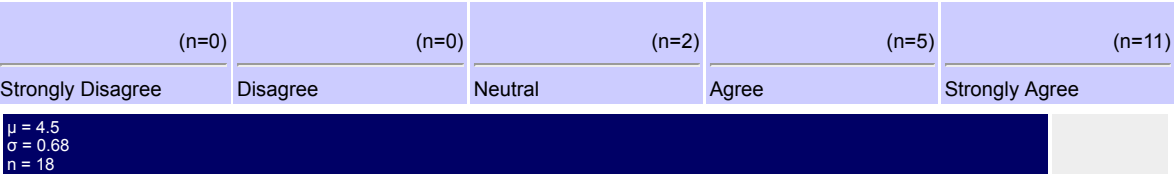

2: Rate the overall quality of this course.

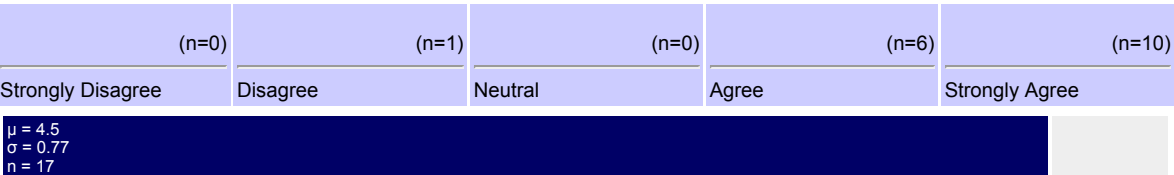

3: The TA addressed content related to the learning objectives for the course.

4: The TA promoted the development of clinical and/or scientific reasoning skills.

5: The TA taught the students in an interactive way.

6: Please provide any positive comment or constructive criticisms that could benefit the TA in future teaching.

1: He was very knowledgeable in lab and did a great job of leading us to answers instead of just telling us

2: Kerim is a great TA.

3: very helpful and kind all the time!

4: I think Karim knows a lot about this topic, but doesn't appear very confident when interacting with students. Believe in yourself! You're great! :-)

5: NA

6: Kerim was an effective instructor during laboratory sessions and made sure that presenters were well prepared for case studies.

7: Allow for more discussions or time to talk about topics relevant to the course

8: He was a good TA and made things pretty relaxed for us.

9: Really helpful in lab and made sure we understood why structures would be in the specific area.

10: Great TA. Very thorough in his teaching, and he takes his job seriously.

11: Kerim is good at answering questions clearly and directly.

12: Great TA!

13: I believe more review sessions and keys to practice problem would be helpful.

14: I have never interacted with this instructor

15: Kerim was familiar with the material. The only criticism is when a student asks about the location of a particular structure, do not tell the student to find the generalized structure instead. If the objective asks the student to find a lymphatic valve, assist the student in finding a lymphatic valve. Do not state that it is not important and identifying a lymph vessel is sufficient. All-in-all, the TA is knowledgeable but could improve how he communicates and directs students in correctly identifying structures.

16: He helps students very well and makes the effort to understand and identify the various histology slides. He does a great job at explaining terms.

17: Kerim was really kind and understanding. I think he really cared about our learning without being too rigid about course structure.

Thank you for taking the time to fill out the form. The Office of Academic Affairs
